

Turning Back the Clock

By Dr. Pichler

Robyn's Eye Opening Story

By Robyn

I was born with no eyelids. My eyelids actually came down to my eyelashes. I feel like surgery was a very good thing for me to do because my eyes had always bothered me. Makeup was a completely different thing because I had no eyelids.

I had visited with several doctors to find one I was most comfortable with. I had been to three consultations and Dr. Pichler was the one I chose. His office was very comfortable and he made me feel very comfortable about him, his experience and his quality of work. I had heard he did really well with eyes. Everybody that I talked to that had gone to him was very happy with his work on their eyes. So, he really specializes in that. He also made me feel very confident about what I wanted to do.

Once he did the surgery and I had lids, my eyes really popped! I feel like I look younger and I've had a lot of people comment on how good I look for my age. I wasn't getting that so much before I had my eyes done. Basically, he corrected that and I am very happy with his work.

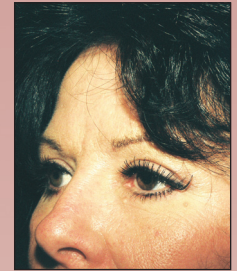

Dr. Pichler, when compared to other places, including Kaiser, which I am a member of, is very reasonably priced. That was a big benefit for me. Nobody wants to pay more than they need to. Also, he has a surgery

center right behind his office, so it's not like you have to go to the hospital. They take care of you right there on their premises and then you get picked up when it's over. I feel 100% better and I'm very glad I did it. He really did a fantastic job!

I have seen him several times since then for injections. The people in his office are very kind. They call you to let you know when you have an appointment coming up. They are just very personable people and I really like that.
