

Turning Back the Clock

By Dr. Pichler

Linda came into our office four years ago because she was upset about the bags under her eyes and her heavy eyelids. She has a very busy schedule managing a local California Highway Patrol office, so I felt very fortunate that we had a chance to follow up with her recently to see how she was doing. Here's how our conversation went:

Q: Why did you decide to have facial surgery?

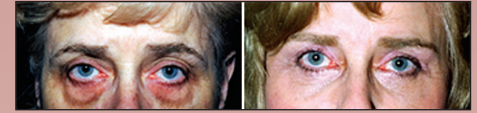

A: Droupy eyelids and bags under the eyes run in our family. Even male members of my family have this problem. My mother Jorun was already a patient of Dr. Pichler since 2000 and was very happy with her results. She recommended me to see Dr. Pichler while I was younger (44) so I could enjoy a youthful look longer and recover faster. My mother was very impressed with Dr. Pichler's work and trusted him to do a good job for me as well.

Q: How did you feel before surgery?

A: Usually, I feel nervous and have a sleepless night before the day of any medical procedure, but after speaking with Dr. Pichler, I felt comfortable, relaxed and confident that everything would go well. My mom had good results and I liked his approach on the pre-op day, so I was never worried.

Q: What was surgery like for you?

A: The surgery went very well and very fast. I almost didn't notice that I was out of surgery! It took two weeks until everything healed perfectly. The aftercare was wonderful because Dr. Pichler and his staff followed up with me all the way, just as they had promised. I like their practice very much because everyone is very personable and professional. I still go back for skin care treatments, which is a great way to enhance the results of my surgery.

Before

After

Q: How are you doing today?

A: I had surgery in 2005 and my eyes still look youthful! I no longer have any bags or excessive skin on my lids and am very happy that I had the procedure done. I am more confident and enjoy a full and healthy life.

Look as Young as You Feel!
